

# PVE Home Lift

## PVE Home Lift

PVE lifts use Vacuum Technology®. Due to the unique circular design, the PVE has one of the smallest footprints available within the home lift marketplace. It comes in different sizes to accommodate either one, two or three passengers. Installation is straightforward as the self-supporting structure attaches to the floor without the need for a pit or wall fixings. The freestanding circular shaft can be fitted through the floor, within a stairwell or installed to reach a balcony/mezzanine area.

- Panoramic view 360°
- Installation within 2-3 days
- Minimal maintenance
- Bespoke finishes
- Eco-friendly
