

## **TDK01 – Easy to see spill proof keyboard**

### **Description**

The keyboard is a standard sized computer keyboard with large bold printing on the keys approx.. 400% bigger than a standard keyboard making it much easier to see. The keyboard is spill proof so if drink accidentally spills on the keyboard it will continue working. The keyboard is compatible with PC's with USB port.

### **Using the keyboard**

Switch off your computer and plug the keyboard into a USB port. Turn on the computer and after a few moments your computer will recognise the keyboard and you can begin using the keyboard as normal.

Should a drink or other liquid spill onto the keyboard, the keys are waterproof and will continue to work. After spillage some liquid may remain in the base of the keyboard, this can be removed by tipping the keyboard upside down and lightly shaking.

Solvent based liquids or extremely hot liquids may damage the plastic components in the keyboard.

**To adjust the angle of the keyboard** ,there are two flip down legs located under the left and right back corners. The legs can be either folded up or down to give the most comfortable position to use the keyboard.

## **Guarantee**

This product is guaranteed from manufacturing fault for 12 months from the date of purchase. If you have any issues with the product please contact your retailer or supplier in the first instance.

At the end of the products life you can return it to the supplier or manufacturer for free of charge disposal. This is to comply with The Waste Electrical and Electronic Equipment Directive (WEEE)
