

# Hinged Accelerator Pedal

## Hinged Accelerator Pedal

**Brig-Ayd's Hinged Accelerator Pedal creates room to safely extend your leg and rest your right foot while operating the car with hand controls.**

### **Prevents accidental operation of the accelerator pedal**

Brig-Ayd's Hinged Accelerator Pedal can be folded safely out of the way, reducing the risk of the pedal accidentally being operated.

The additional space that is created allows the driver to stretch out their right leg, making it an ideal companion to hand controls.

It's also particularly helpful if you share your car with someone who doesn't require hand controls, as the accelerator pedal can easily be folded back down.

Over the last 45 years, Brig-Ayd Controls have developed an innovative catalogue of driving solutions that can be tailored to your unique requirements.

- Easily flip down the accelerator pedal when required
- Ideal for hand control users
- Creates footwell space for your right foot
- Provides a more comfortable driving position
