

director pro

User Guide

Thank you for your purchase of Director Pro, a powerful directional microphone that plugs easily into any standard voice recorder or Dictaphone for recording lectures and discussion groups for subsequent review and analysis. Director Pro can also be plugged into a standard loop amplifier and provide hearing aid wearers within the loop with greatly enhanced sound level and clarity.

Director Pro is a lightweight microphone for focusing on a speaker or a desired sound source up to 25 metres away. Attached to the microphone is a 1.5 metre cable and jack that plugs easily into a voice recorder, Dictaphone or loop amplifier.

Director Pro contains no batteries and receives power directly from the voice recorder, Dictaphone or loop amplifier.

If you have any questions about Director Pro please contact your distributor.

Setting up Director Pro

Director Pro is ready to use out of the package. Simply plug the cable jack into the appropriate input socket of the voice recorder, Dictaphone or loop amplifier.

Director Pro can be placed on a desk or table, or hand held and pointed towards the speaker or the desired sound source.
