autochair

Autochair's Smart Lifter LC & LM are 4-way boot hoists that lift your scooter, wheelchair, or powerchair and load it into the boot of your car at the touch of a button.

The Smart Lifter LC is the No.1 Best Selling Hoist in the UK

The 4-Way Hoist alleviates the effort required to lift and load a mobility device into the car by raising the device up and powering it into the vehicle.

Multiple variants for the 4-Way Boot Hoist are available to suit your vehicle and mobility device.

All Smart Lifter Boot Hoists now feature a new control box and handset with soft touch illuminated buttons, soft start motors, and overcurrent protection making it more comfortable to hold, safer to operate, and easier to use.

Autochair is a leading manufacturer of vehicle adaptations which have been making a difference to the lives of tens of thousands of people for over 40 years.

- New electronics with soft start motors for smooth operation
- New easy-grip handset with soft touch illuminated buttons
- Capacities up to 100kg for a large range of devices
- Can lift your scooter or wheelchair into the car in less than 60 seconds
- At only 8kg, the hoist arm is easily removable when not in use to create more boot space
- Suitable for over 450 vehicles

LOADING & STOWAGE

Make easy work of loading and unloading a wheelchair, mobility scooter or powerchair into your vehicle with our loading and stowage systems. All at the touch of a button. Whether you require car hoists or wheelchair roof boxes, we have got you covered.

DRIVING AIDS

Regain and retain your independence with our colossal range of driving adaptations tailored to you and your vehicle, including mechanical hand controls, electronic accelerators, left foot pedals, pedal guards, remote control devices, steering aids, and much more.

EASY VEHICLE ACCESS

Get in and out of your vehicle safely and easily with our specialised range of accessibility adaptations for drivers and passengers with reduced mobility. We can aid your transfer from a wheelchair, scooter, powerchair or even from standing, with swivel seats, transfer plates, and person hoists.
