

Autochair Transfer Plate (ATP)

Manual Quick Release Transfer Plate

The Autochair Transfer Plate makes getting seated easier for those with reduced mobility.

Provides a secure platform to transfer into the vehicle

The manual quick release transfer plate provides a stable temporary platform to aid transferring in and out of a vehicle.

It gives that extra support and confidence to move safely into their car and then out again, making it ideal for people with almost all levels of mobility.

Installed for driver or passenger use, the Autochair Transfer Plate bridges the gap between a mobility device and the car.

Autochair is a leading manufacturer of vehicle adaptations which have been making a difference to the lives of tens of thousands of people for over 40 years.

- Quickly detaches allowing for a swift transfer in and out of the vehicle
- 120kg Weight Capacity
- Reduces the transfer distance between a mobility device and the car seat
- Economic alternative to a swivel seat
- Can be installed for passenger or driver's side use

LOADING & STOWAGE

Make easy work of loading and unloading a wheelchair, mobility scooter or powerchair into your vehicle with our loading and stowage systems. All at the touch of a button. Whether you require car hoists or wheelchair roof boxes, we have got you covered.

DRIVING AIDS

Regain and retain your independence with our colossal range of driving adaptations tailored to you and your vehicle, including mechanical hand controls, electronic accelerators, left foot pedals, pedal guards, remote control devices, steering aids, and much more.

EASY VEHICLE ACCESS

Get in and out of your vehicle safely and easily with our specialised range of accessibility adaptations for drivers and passengers with reduced mobility. We can aid your transfer from a wheelchair, scooter, powerchair or even from standing, with swivel seats, transfer plates, and person hoists.
