

### Make your scooter easier to transport, load into vehicles, and store with our lightweight and easily removable Smart Scooter Seat

#### No single part weighs more than 3kg

The Autochair Smart Scooter Seat is a lightweight replacement seat which makes removing the seat easier and safer, with just one hand.

If you have a larger scooter or a smaller car, our easily removable seat greatly reduces the scooter's vertical height. This makes it much easier to stow, so you can still take your scooter with you on your journey.

Features a rear mounting point for a range of scooter accessories and storage options.

Autochair is a leading manufacturer of vehicle adaptations which have been making a difference to the lives of tens of thousands of people for over 40 years.

- Elegant, lightweight, design to reduce the height of your scooter making it easier to load and stow a larger scooter into a smaller vehicle
- Seat Rotates 360 degrees and locks in place every 90 degrees
- Comfortable dual-density foam padded seat and backrest for longer journeys
- Easy to remove and reassemble with just one hand
- Weatherproof materials for a longer lifespan
- Compatible with all Autochair Boot Hoists
- Suitable for users up to 120kg.

## LOADING & STOWAGE

---

Make easy work of loading and unloading a wheelchair, mobility scooter or powerchair into your vehicle with our loading and stowage systems. All at the touch of a button. Whether you require car hoists or wheelchair roof boxes, we have got you covered.

## DRIVING AIDS

---

Regain and retain your independence with our colossal range of driving adaptations tailored to you and your vehicle, including mechanical hand controls, electronic accelerators, left foot pedals, pedal guards, remote control devices, steering aids, and much more.

## EASY VEHICLE ACCESS

---

Get in and out of your vehicle safely and easily with our specialised range of accessibility adaptations for drivers and passengers with reduced mobility. We can aid your transfer from a wheelchair, scooter, powerchair or even from standing, with swivel seats, transfer plates, and person hoists.
