

**TDW01/TDW02**

## **Easy-to-see watches**

### **General description**

Thoughtfully Designed easy-to-see watches have been designed with big, bold hands and numbers, which contrast with the plain white dial, making it easier to tell the time than on a normal watch face.

The Crown (winder) of the watch is designed to be easy to grip.

On first using the watch, **remove the watch's "sleeper"**. The "sleeper" is a small piece of plastic which is fitted in between the watch and the crown (winder), and prevents the watch from working, and the battery from running down whilst in transit.

### **Setting the time**

Once the "sleeper" has been removed, turn the (crown) winder to set the time and then push it back in and the watch will now be activated. The time can be altered at any time by pulling the crown (winder) out slightly and turning it to move the hands, then push it back in to start the watch working again.

The watch is battery powered and does not require winding.

### **If the watch stops it requires a new battery.**

Always check the battery first if you think a fault has developed.

### **Battery replacement**

It is recommended that you return your watch to us or take it to a watch repairer or jeweller to change the battery.

Battery: 1x Silver oxide SR626SW (SR66/377) battery.

Your watch is guaranteed for 12 months from date of purchase

**Please note:** The **guarantee does not cover batteries** or watch straps.

**The watch is splash proof but not waterproof do not immerse in water.**

## Terms and conditions of sale

Your watch is guaranteed from manufacturing faults for 12 months from date of purchase .

**Please note:** The **guarantee does not cover batteries** or watch straps. If you have any issues with the product , then please contact your retailer in the first instance.
