Abloy Door Opener

Secure and easy to control door entry systems

Abloy door openers are high quality door operators that work with all doors from heavy duty, high traffic doors to exterior fire doors, and can be operated by various means, including controllers with infrared technology, pressure pads, proximity readers and push-pads.

Easy to Use

The Abloy Swing Door Opener can

be fitted to a wide range of doors. The easy to control door opener, gives the user total control and independence when choosing to move from the inside out.

Added Security

The Abloy Swing Door Opener can be configured to work with a range of control devices, all designed to give the user total control and peace of mind. The door opener can be configured to work with the evoassist app and also with Steeper intercom systems, giving additional security to the user and their wider network.

Compact Design

The low profile and discreet design of the Abloy Swing Door Opener means that it will suit both commercial and residential settings. The white cover sits neatly above the door and with no cables or wires coming from the device, the door opener will be unobtrusive within the user's home.

Key Features

- Motor or hydraulic driven opening and closing.
- Adjustable hold-open time and opening speed.
- Battery back-up for peace of mind.
- Free swing function allowing the door to be left in the open position when required.
