

Quick Release Pedal Guard

Universal Quick Release Pedal Guard

Brig-Ayd's Quick Release Pedal Guard prevents the accidental operation of the foot pedals, making it ideal for hand control drivers.

Quick Release guard can be removed with one hand

Pedal guards are an important safety adaptation, placed in front of the foot pedals to prevent them being pressed accidentally.

Brig-Ayd's Quick Release Pedal Guard can be quickly detached, with one hand, to regain access to the pedals. An indicator tab clearly shows when the guard is securely locked in place.

A pedal guard is a wise accompaniment to hand controls where a driver is at risk of accidentally interacting with the pedals.

Over the last 45 years, Brig-Ayd Controls have developed an innovative catalogue of driving solutions that can be tailored to your unique requirements.

- Safely guards the accelerator and brake pedals from accidental use
- Can be used in conjunction with any hand controls
- The safety tab clearly indicates when the guard is correctly locked in place
- Quickly release and remove the guard to access original pedals

BRIG-AYD CONTROLS

LOADING & STOWAGE

Make easy work of loading and unloading a wheelchair, mobility scooter or powerchair into your vehicle with our loading and stowage systems. All at the touch of a button. Whether you require car hoists or wheelchair roof boxes, we have got you covered.

DRIVING AIDS

Regain and retain your independence with our colossal range of driving adaptations tailored to you and your vehicle, including mechanical hand controls, electronic accelerators, left foot pedals, pedal guards, remote control devices, steering aids, and much more.

EASY VEHICLE ACCESS

Get in and out of your vehicle safely and easily with our specialised range of accessibility adaptations for drivers and passengers with reduced mobility. We can aid your transfer from a wheelchair, scooter, powerchair or even from standing, with swivel seats, transfer plates, and person hoists.
