Tailor-made safe living
spaces and beds for people
with complex needs.

Welcome to

At Safespaces we have over 20 years of experience in the design, manufacture and supply of tailor-made safe living spaces and beds.

We offer a range of innovative products designed to reduce the risk of injury, provide a low stimulation environment and support sensory processing needs.

Our specialist products are suitable for people with complex needs including autism, learning difficulties, epilepsy and dementia. They are used in a wide range of environments including family homes, schools, hospitals, care and respite settings throughout the UK and worldwide.

Why choose us?

Tailor-made to meet complex needs

Manufactured in the UK

Compliant with MHRA Medical Device Regulations
All products are CE/UKCA marked

Virtual demonstrations and assessments

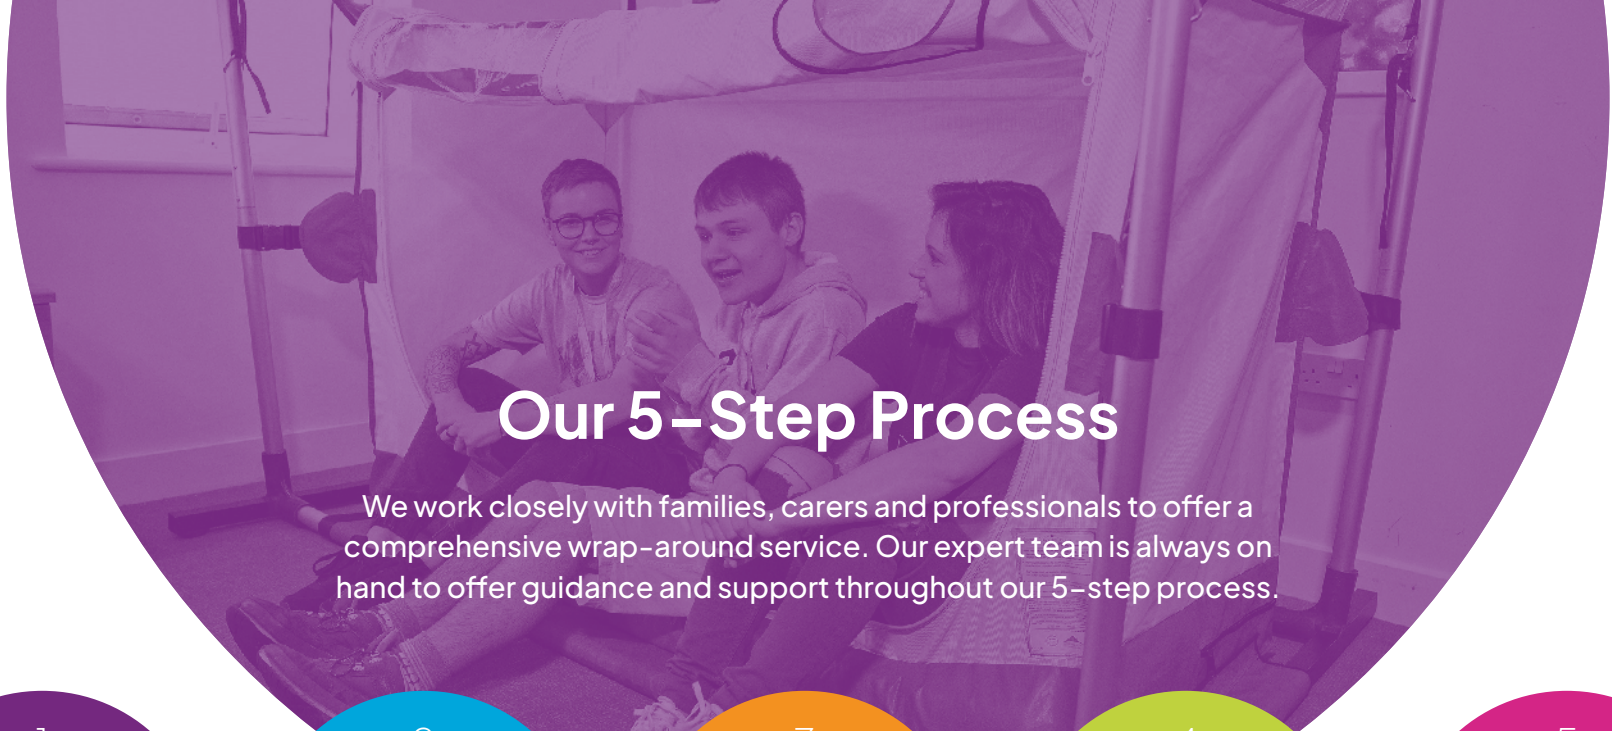

Expert support and guidance

Trusted for over 20 years

Our 5-Step Process

We work closely with families, carers and professionals to offer a comprehensive wrap-around service. Our expert team is always on hand to offer guidance and support throughout our 5-step process.

1

Contact Us

Upon your initial enquiry, we will conduct a 'fact find' to gain an understanding of the individual's conditions and behaviours including their mobility, behaviours, sleep patterns, and the intended use of the product.

2

Assessment and Product Design

A virtual assessment will be arranged with our expert Product Advisors, who will provide a comprehensive product demonstration and discuss how the product can be tailored to best meet the individual's needs.

3

Funding Advice

There are many funding options available to help families access essential equipment - in 2022, 93% of our products were fully funded. We can provide information on the best options and support you through the application process.

4

Manufacture and Installation

Our products are manufactured and carefully hand-crafted in the UK. We have a team of experienced technicians who deliver and install our products in family homes, schools, hospitals, care and respite settings.

5

Wrap-Around Care

Following installation, we will provide key information and guidance to help you get the most out of our products. We take pride in establishing long-term relationships and are always available to offer further advice and assistance.

Safespace

A soft, flexible sleep and relaxation space

- ✓ Safe, strong and durable
- ✓ Flexible sides and soft padded floor to prevent injury
- ✓ Calming low stimulation environment
- ✓ Easily transformed into a sensory space

The Safespace is a tailor-made sleep and relaxation space designed for adults and children with complex needs.

It has flexible sides and a soft padded floor, providing a comfortable and safe environment that reduces the risk of injury from hard surfaces, providing peace of mind for parents and carers.

Who is it suitable for?

The Safespace is designed for adults and children with complex needs including autism, learning difficulties, epilepsy, and behaviours that challenge. This can include those with self-injurious behaviours such as head banging or those that seek sensory feedback from hard surfaces.

Key Benefits

Improve Sleep Patterns

The Safespace is ideal for bedtime use as it provides a low sensory space that minimises stimulation helping the user to settle and sleep for longer periods. It also provides a safe environment for those who continue to wake at night.

Meet Sensory Needs

For individuals who seek out sensory stimulation, the Safespace provides the perfect sensory retreat. A wide range of sensory equipment can be used including fibre optics, projections and play shapes to transform the Safespace.

Support Behaviour Self-management

A Safespace provides a private space in which an individual can retreat when feeling stressed, allowing time to de-escalate in a safe environment. This personal space can support the development of behaviour self-management.

Design Options

Your Safespace can be tailored to meet complex needs.

- ✓ Size
- ✓ Colours
- ✓ Doors
- ✓ Windows
- ✓ Flooring
- ✓ Mattress
- ✓ Water resistant seams
- ✓ Tube holes
- ✓ Zip access for equipment
- ✓ White wall for projecting
- ✓ Visual Deterrent Panels (VDPs)

Sizes

Safespaces are available in a range of sizes from a single bed up to 2.5m x 2.5m. A minimum clearance of 25cm is required from the product walls to any hard surface at all times.

Safespace Hi-Lo

A robust, height adjustable bed with soft, flexible sides

- ✓ Soft, flexible sides to prevent injury and a mesh ceiling
- ✓ Safe, low stimulation environment ideal for sleep
- ✓ Height adjustable platform for carers

The Safespace Hi-Lo is designed for individuals who require nursing care with the versatility of a height adjustable platform. The soft, flexible sides provide a comfortable, safe environment in which someone can sleep without the risk of injury from hard surfaces or moving parts.

The Safespace Hi-Lo can be fully tailored to meet the needs of the user and their carers. This includes a number of panel options, including the choice of transparent windows to facilitate communication between the user and their carers and tailored openings providing a variety of access points.

Who is it suitable for?

The Safespace Hi-Lo is designed for adults and children with complex needs and limited mobility. It is ideal for those who may demonstrate strong or self-injurious behaviours. Its robust design makes it suitable for individuals who may thrash, push or kick.

“The installation went well and the technicians were friendly and helpful in showing us how to use the bed. We have found the product amazing! We have never had so much sleep, sometimes 12–13 hours. Since having the bed installed, my son’s sleep has improved, he is safer and I do not need to get up at night anymore because he can now settle himself. We are happy and feel reassured. It has been a life changer and we are happy to be finally getting some sleep.”

Laura, Selby

Design Options

Your Safespace Hi-Lo can be tailored to meet complex needs.

- ✓ Water resistant seams

Cosyfit

A robust high-sided sleep and relaxation area

- ✓ Soft padded and flexible sides to prevent injury
- ✓ Low stimulation environment ideal for sleep
- ✓ Modular design to meet changing needs

The Cosyfit provides a safe environment in which someone can sleep, relax or engage with sensory equipment. It offers a combination of soft padded and flexible sides making it ideal for individuals who may be at risk of falling or hurting themselves on hard bed surrounds.

Who is it suitable for?

The Cosyfit is designed for adults and children with limited mobility with complex needs including autism, epilepsy, learning difficulties and behaviours that challenge. Its robust design makes it suitable for those who thrash, push or kick.

Sensory

Cosyfit Platform

The Cosyfit Platform is suitable for adults and children with limited mobility. The fixed platform is raised off the floor making it ideal for individuals who require a hoist.

Cosyfit Hi-Lo

The Cosyfit Hi-Lo is designed for adults and children with limited mobility who require personal or nursing care. It provides a safe sleep environment with the flexibility of a height adjustable platform providing a comfortable working height for carers.

Cosyfit Hi-Lo Profiling

The Cosyfit Hi-Lo Profiling is suitable for individuals with extremely limited mobility who require support with sitting and raising themselves. This specialist bed offers backrest and knee break functions, as well as trendelenburg functions and height-adjustability, which support many aspects of nursing care.

Siesta

A versatile, strong and comfortable high-sided bed

- ✓ Soft, flexible sides to prevent injury
- ✓ Safe, low stimulation environment ideal for sleep
- ✓ Versatile to meet a wide range of needs

The Siesta provides a safe, low stimulation environment in which someone can sleep without the risk falling or hurting themselves on hard bed surrounds.

It has soft, flexible sides and can be fully tailored to meet the needs of the user and their carers. This includes a choice of opening panels on all four sides, providing easy access for carers.

Who is it suitable for?

The Siesta is designed for adults and children with complex needs and limited mobility. It is ideal for those who may demonstrate strong or self-injurious behaviours. Its robust design makes it suitable for individuals who may thrash, push or kick.

“We use the Siesta a great deal of the time now. It has prevented a great deal of safety incidents for us”

Siesta Hi-Lo

A comfortable, height adjustable bed

- ✓ Soft, flexible sides to prevent injury
- ✓ Safe, low stimulation environment ideal for sleep
- ✓ Easy-clean design, ideal for healthcare settings
- ✓ Height adjustable platform for carers

The Siesta Hi-Lo provides a safe sleep environment with the versatility of a height adjustable platform making it ideal for individuals who require nursing care.

The soft, flexible sides offer a comfortable, low stimulation space in which someone can sleep without the risk of injury from hard surfaces or moving parts.

The Siesta Hi-Lo's easy clean design makes it particularly suitable for hospital and healthcare settings where a wide range of clients' needs can be accommodated by one extremely tough and versatile piece of equipment.

Who is it suitable for?

The Siesta H-Lo is designed for adults and children with complex needs and limited mobility. It is ideal for those who require personal or nursing care.

“Thank you for your tremendous assistance yesterday and for your prompt action in securing the specialist bed. I would also like to thank you for organising the expeditious delivery to our Children's Hospital.”

Sharon,
Children's Hospital

Voyager

A safe, easily transportable travel bed.

- ✓ Soft, flexible sides to prevent injury
- ✓ Calming low stimulation environment ideal for sleep
- ✓ Quick and easy to assemble

The Voyager travel bed provides a low stimulation, safe sleep environment designed for holidays, respite care and trips away from home. It has flexible walls and a soft floor, providing a comfortable and safe environment that reduces the risk of injury from hard surfaces, providing peace of mind for parents and carers.

It is particularly useful for those with autism and who find change difficult, as it provides a consistent calm area that can be transported in the boot of a car, or taken as hold luggage on flights.

The Voyager packs away into 2 transport bags and can be assembled in approximately 15 minutes.

Who is it suitable for?

The Voyager is designed for adults and children with complex needs including autism, epilepsy, behaviours that challenge and learning difficulties. This can include those who are uncomfortable in unfamiliar surroundings or are used to a Safespace at home.

Voyager Compact

A compact and safe transportable travel bed.

- ✓ Compact, strong and robust
- ✓ Calming low stimulation environment ideal for sleep
- ✓ Quick and easy to assemble

The Voyager Compact provides a cosy, low stimulation, sleep environment ideal for those who prefer smaller spaces.

Designed for holidays, respite care and trips away from home, the Voyager Compact has flexible walls and a soft floor. Its compact, robust design makes it particularly suited to those with strong, boisterous behaviours as it provides a safe environment that reduces the risk of injury from hard surfaces whilst away from home.

The Voyager Compact packs away into 2 transport bags and can be assembled in approximately 10 minutes.

Who is it suitable for?

The Voyager Compact is designed for adults and children with complex needs including autism, epilepsy, behaviours that challenge and learning difficulties.

Our Impact

We are committed to supporting our customers throughout their journey with us and we pro-actively collate feedback. The responses we receive provide an evidence base detailing the real world impact of the products for users, their families and carers.

“Our boy is safe at night and loves going to sleep now. His settling has improved which has reduced stress on us all.”

Helpful Information

Funding

93% of Safespaces products were fully funded in 2022.

There are many funding options available to help families access essential equipment. Our products are most commonly funded by disabled facilities grants (DFG), local authorities, community equipment providers and charities. We can provide information on the best options and support you through the process.

How much are our products?

Our products are tailor-made to suit the individual needs of our users. We offer virtual product assessments to help us fully understand the user's requirements and suitability. Our expert Product Advisors can provide a product demonstration and discuss in detail how the product can be tailored to best meet the user's needs. Following an assessment, we will design your product and provide an itemised quotation.

Are our products compliant?

All of our products are CE/UKCA marked and comply with the European Medical Device Regulations (MDR). These stringent regulatory requirements require us to meet high quality standards and undergo rigorous product testing. We can provide further technical information upon request.

We follow the British Healthcare Trades Association's (BHTA) Code of Practice approved by the Chartered Trading Standards Institute which safeguards the interests of all customers.

Our Services

We offer a range of additional services including

- Product Moves
- Rental Options
- Cleaning Services
- Maintenance Packages
