

Etac Swift shower chair/stool

 etac®

A prize-winning series of shower stools/chairs designed with functionality and simplicity in mind.

Swift changes with the circumstances

Swift is adaptable to different needs. It is possible to start using the shower stool and add armrests and/or backrest if the circumstances change.

Swift is stable on any floor

Swift has a unique construction that adapts to uneven floors thanks to its built-in flexibility. The soft ferrules have in addition a good grip to the floor. These features contribute to ensuring the safety of the user.

High comfort

The seat has a comfortable shape with holes for drainage. The surface also has a pattern which prevent Swift from becoming slippery when wet. Soft seats which are especially suited for showering are available should extra comfort be needed.

Swift shower chair
The backrest can be placed on two sides of the stool to give the user the choice of having a recess or not.

Swift shower stool with armrests
The stool can be equipped with armrests to give extra help when standing up.

Easy to assembly
Swift is easy to assembly.

Height adjustable – no tools required
Easy to adjust in height with the telescoping legs. The construction is made without any loose parts that can get lost.

Ferrules of the highest quality
The soft ferrules have a shape and material that ensure a good grip.

Swift with slightly tilted seat

To facilitate standing up from the chair, Swift can be tilted slightly forward by setting the height of the rear legs one level higher than the front legs. This function can also be used to get a flat seat at uneven floor surfaces. The height of the legs should however never be set with more difference than one step.

Easy to handle

Swift is easy to handle thanks to the light weight. Swift comes flat-packed and is both easy and quick to assemble without the need for any tools. It is also corrosion free.

Swift low

Swift

Swift is available in three different colours. Green, grey and blue.

Description
